

Boot Number

Motor Master Powersports mfg. the Dura-Boot and to identify one you can look on the top of the boot here to determine the part number.

Inside Diameter Small End

Measure at the widest point keeping the area being measured round not ovaled. (+/- 0.020)

BELLOW

Number of Bellows

Count the number of bellows between the small and large ends of the boot.

Overall Boot Height

The height is based on the Dura-Boot dimension & doesn't always match the height of an OE boot.

Inside Diameter Large End

Measure at the widest point keeping the area being measured round not ovaled. (+/- 0.020)
